## TABLE OF CONTENTS

FOREWORD .....	1
LIST OF LICENSED GENERAL CONTRACTORS (In-State) .....	1
LIST OF LICENSED GENERAL CONTRACTORS (Out-of-State) .....	332

Licenses renewed after March 1, 2005 are not listed in this publication. To verify the status of any licensed contractor whose name does not appear in this listing, please access our Web site at **www.nclbgc.org** or call the Board's office at (919) 571-4183.

## FOREWORD

This publication is intended for use by local and state governmental departments and units, Professional Engineers, Architects and other construction professionals, and the general public.

All licenses issued by the Board of General Contractors expire on December 31st each year. Licenses not renewed 60 days after that date (December 31) shall become invalid, in accordance with provisions of General Statute 87, Section 10. All licenses renewed by the Board for the calendar year prior to March 1, 2005 are listed in this directory.

Licenses of individuals, partnerships and corporations are listed according to town or city of residence, in alphabetical order. The precise name under which the license was issued is listed along with the licensee's most current address provided at time of printing. The license number appears to the right of each name.

Limitations and classifications for each license are shown directly under the address. "LIMITED—BUILDING" for example, indicates the holder of a "LIMITED" limitation and "BUILDING" classification of license. More than one classification of license may be held by licensees; licenses listed as "UNCLASSIFIED" meet the qualifications for all classifications of licensure.

Licenses may be issued in the following classifications:

### Classification

(a) A general contractor must be certified in one of five classifications. These classifications are:

- (1) **Building Contractor.** This classification covers all building construction activity including but not limited to: commercial, industrial, institutional, and all residential building construction; parking decks; all site work, grading and paving of parking lots, driveways, sidewalks, curbs, gutters, and water and wastewater systems which are ancillary to the aforementioned structures and improvements; and covers the work done under the specialty classifications of S(Concrete Construction), S(Insulation), S(Interior Construction), S(Marine Construction), S(Masonry Construction), S(Roofing), S(Metal Erection), S(Swimming Pools), and S(Asbestos).
- (2) **Residential Contractor.** This classification covers all construction activity pertaining to the construction of residential units which are required to conform to the residential building code adopted by the Building Code Council pursuant to G.S. 143-138; all site work, driveways, sidewalks, and water and wastewater systems ancillary to the aforementioned structures and improvements; and the work done as part of such residential units under the specialty classifications of S(Insulation), S(Interior Construction), S(Masonry Construction), S(Roofing), S(Swimming Pools), and S(Asbestos).
- (3) **Highway Contractor.** This classification covers all highway construction activity including but not limited to: grading, paving of all types, installation of exterior artificial athletic surfaces, relocation of public and private utility lines ancillary to the principal project, bridge construction and repair, culvert construction and repair, parking decks, sidewalks, curbs, gutters and storm drainage. Includes installation and erection of guard rails, fencing, signage and ancillary highway hardware; covers paving and grading of airport and airfield runways, taxiways, and aprons, including the installation of fencing, signage, runway lighting and marking; and covers work done under the specialty classifications of S(Boring and Tunneling), S(Concrete Construction), S(Marine Construction), S(Railroad Construction), and H(Grading and Excavating).
- (4) **Public Utilities Contractor.** This classification includes those whose operations are the performance of construction work on water and wastewater systems and on the subclassifications of facilities set forth in G.S. 87-10(3). The Board may issue a license to a public utilities contractor that is limited to any of the subclassifications set forth in G.S. 87-10(3) for which the contractor qualifies. A public utilities contractor license covers work done under the specialty classifications of S(Boring and Tunneling), PU(Communications), PU(Fuel Distribution), PU(Electrical—Ahead of Point of Delivery), PU(Water Lines and Sewer Lines), PU(Water Purification and Sewage Disposal), and S(Swimming Pools).
- (5) **Specialty Contractor.** This classification covers all construction operation and performance of contract work outlined as follows:
  - (A) H(Grading and Excavating). Covers the digging, moving and placing of materials forming the surface of the earth, excluding air and water, in such a manner that the cut, fill, excavation, grade, trench, backfill, or any similar operation can be

- executed with the use of hand and power tools and machines commonly used for these types of digging, moving and material placing. Covers work on earthen dams and the use of explosives used in connection with all or any part of the activities described in this Subparagraph. Also includes clearing and grubbing, and erosion control activities.
- (B) S(Boring and Tunneling). Covers the construction of underground or underwater passageways by digging or boring through and under the earth's surface including the bracing and compacting of such passageways to make them safe for the purpose intended. Includes preparation of the ground surfaces at points of ingress and egress.
- (C) PU(Communications). Covers the installation of the following:
- (i) All types of pole lines, and aerial and underground distribution cable for telephone systems;
  - (ii) Aerial and underground distribution cable for Cable TV and Master Antenna TV Systems capable of transmitting R.F. signals;
  - (iii) Underground conduit and communication cable including fiber optic cable; and
  - (iv) Microwave systems and towers, including foundations and excavations where required, when the microwave systems are being used for the purpose of transmitting R.F. signals; and installation of PCS or cellular telephone towers and sites.
- (D) S(Concrete Construction). Covers the construction and installation of foundations, pre-cast silos and other concrete tanks or receptacles, pre-stressed components, and gunite applications, but excludes bridges, streets, sidewalks, curbs, gutters, driveways, parking lots and highways.
- (E) PU(Electrical—Ahead of Point of Delivery). Covers the construction, installation, alteration, maintenance or repair of an electrical wiring system, including sub-stations or components thereof, which is or is intended to be owned, operated and maintained by an electric power supplier, such as a public or private utility, a utility cooperative, or any other properly franchised electric power supplier, for the purpose of furnishing electrical services to one or more customers.
- (F) PU(Fuel Distribution). Covers the construction, installation, alteration, maintenance or repair of systems for distribution of petroleum fuels, petroleum distillates, natural gas, chemicals and slurries through pipeline from one station to another. Includes all excavating, trenching and backfilling in connection therewith. Covers the installation, replacement and removal of above ground and below ground fuel storage tanks.
- (G) PU(Water Lines and Sewer Lines). Covers construction work on water and sewer mains, water service lines, and house and building sewer lines as defined in the North Carolina State Building Code, and covers water storage tanks, lift stations, pumping stations, and appurtenances to water storage tanks, lift stations and pumping stations. Includes pavement patching, backfill and erosion control as part of such construction.
- (H) PU(Water Purification and Sewage Disposal). Covers the performance of construction work on water and wastewater systems, water and wastewater treatment facilities and all site work, grading, and paving of parking lots, driveways, sidewalks, and curbs and gutters which are ancillary to such construction of water and wastewater treatment facilities. Covers the work done under the specialty classifications of S(Concrete Construction), S(Insulation), S(Interior Construction), S(Masonry Construction), S(Roofing), and S(Metal Erection) as part of such work on water and wastewater treatment facilities.
- (I) S(Insulation). Covers the installation, alteration or repair of materials classified as insulating media used for the non-mechanical control of temperatures in the construction of residential and commercial buildings. Does not include the insulation of mechanical equipment and ancillary lines and piping.
- (J) S(Interior Construction). Covers the installation of acoustical ceiling systems and panels; drywall partitions (load bearing and non-load bearing), lathing and plastering, flooring and finishing, interior recreational surfaces, window and door installation, and installation of fixtures, cabinets and millwork. Includes the removal of asbestos and replacement with nontoxic substances.
- (K) S(Marine Construction). Covers all marine construction and repair activities and all types of marine construction in deep-water installations and in harbors, inlets, sounds, bays, and channels; covers dredging, construction and installation of pilings, piers, decks, slips, docks, and bulkheads. Does not include structures required on docks, slips and piers.
- (L) S(Masonry Construction). Covers the installation, with or without the use of mortar or adhesives, of the following:
- (i) Brick, concrete block, gypsum partition tile, pumice block or other lightweight and facsimile units and products common to the masonry industry;
  - (ii) Installation of fire clay products and refractory construction; and
  - (iii) Installation of rough cut and dressed stone, marble panels and slate units, and installa-

- tion of structural glazed tile or block, glass brick or block, and solar screen tile or block.
- (M) S(Railroad Construction). Covers the building, construction and repair of railroad lines including:
- (i) The clearing and filling of rights-of-way;
  - (ii) Shaping, compacting, setting and stabilizing of road beds;
  - (iii) Setting ties, tie plates, rails, rail connectors, frogs, switch plates, switches, signal markers, retaining walls, dikes, fences and gates; and
  - (iv) Construction and repair of tool sheds and platforms.
- (N) S(Roofing). Covers the installation and repair of roofs and decks on residential, commercial, industrial, and institutional structures requiring materials that form a water-tight and weather-resistant surface. The term "materials" shall be defined for purposes of this Subparagraph to include, among other things, cedar, cement, asbestos, clay tile and composition shingles, all types of metal coverings, wood shakes, single ply and built-up roofing, protective and reflective roof and deck coatings, sheet metal valleys, flashings, gravel stops, gutters and downspouts, and bituminous waterproofing.
- (O) S(Metal Erection). Covers:
- (i) The field fabrication, erection, repair and alteration of architectural and structural shapes, plates, tubing, pipe and bars, not limited to steel or aluminum, that are or may be used as structural members for buildings, equipment and structure; and
  - (ii) The layout, assembly and erection by welding, bolting or riveting such metal products as, but not limited to, curtain walls, tanks of all types, hoppers, structural members for build-
- (P) S(Swimming Pools). Covers the construction, service and repair of all swimming pools. Includes:
- (i) Excavation and grading;
  - (ii) Construction of concrete, gunite, and plastic-type pools, pool decks, and walkways, and tiling and coping; and
  - (iii) Installation of all equipment including pumps, filters and chemical feeders. Does not include direct connections to a sanitary sewer system or to portable water lines, nor the grounding and bonding of any metal surfaces or the making of any electrical connections.
- (Q) S(Asbestos). This classification covers renovation or demolition of activities involving the repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos Containing Materials (RACM) for any commercial, industrial, or institutional building, whether public or private. It also covers all types of residential building construction involving RACM during renovation and/or demolition activities.
- (b) An applicant may be licensed in more than one classification of general contracting provided the applicant meets the qualifications for the classifications, which includes passing the examination for the classifications in question. If an applicant passes the building, public utilities and highway examinations, the license granted to the applicant will carry with it a designation of "unclassified."

General Statute 87-10 provides that licenses designated as LIMITED authorize the holder to practice general contracting for projects costing up to \$350,000. Those designated INTERMEDIATE are authorized to practice general contracting on single projects costing up to \$700,000. UNLIMITED license holders may practice general contracting on projects without restriction as to the value of any single project.

Persons, firms and corporations frequently apply to the Board for changes in limitation or classifications of licensure. For clarification or further information concerning any license holder's current limitation or classifications, please access our Web site at **[www.nclbgc.org](http://www.nclbgc.org)** or call the Board's office at (919) 571-4183.

The authority of the North Carolina Licensing Board for General Contractors is granted by virtue of Chapter 318 of the Public Laws of 1925, as amended by the North Carolina General Assembly.
